

3rd\_party/gflag-2.1.2  
/include/gflags/gflags  
\_declare.h

```
graph TD; A["3rd_party/gflag-2.1.2<br>/include/gflags/gflags<br>_declare.h"] --> B["string"]; A --> C["stdint.h"]
```

The diagram illustrates the dependencies of the header file `3rd_party/gflag-2.1.2/include/gflags/gflags_declare.h`. It is represented by a gray rectangular box at the top. Two blue arrows originate from the bottom edge of this box, pointing downwards to two separate white rectangular boxes. The left arrow points to a box containing the text `string`, and the right arrow points to a box containing the text `stdint.h`. This visualizes that the `gflags_declare.h` file depends on both the `string` library and the `stdint.h` header file.
